

In times of transition, do you know what you have, and how to protect it?

Hilco Asset Protection ("HAP") was recently engaged by a Fortune 500 company to provide loss prevention specialists at several locations across the United States and Canada. HAP's loss prevention team conducted detailed site and collateral assessments within 72 hours of being engaged across two countries and more than 50 locations. The assessment and inventory service provided by HAP allowed the client, in a cost effective and efficient way, to view photos and video of the various sites and inventory and review a detailed inventory report. Upon completion of the site assessments, HAP was engaged to monitor the facilities to ensure the facilities and inventories remained intact through a security program designed and implemented by HAP, which included a combination of uniformed guards, site visits, surveillance equipment and signage at the facilities.
